About the International Exchange Center

DIRECTOR'S MESSAGE

Advancing as a Leading Institution of the Korean Wave in Education and Opening Pathways to Global Dreams

Bucheon University International Exchange Center, founded on our university's educational philosophy of "Cultivating people of character, those who perform their work with integrity, and technicians worthy of their craft," plans and operates a wide range of international programs that enable students to grow into talented individuals equipped with the competencies required in a global era.

The International Exchange Center provides extensive international experiences—including student exchange, overseas training, language programs, and global internships—through cooperation with universities and institutions around the world, while also supporting international students' academics and daily lives to ensure a successful study-abroad experience.

In addition, our Global Language Center operates the Korean Language Institute, offering systematic Korean language education and diverse cultural experiences. Through these programs, we support international students in improving their Korean proficiency and gaining a deeper understanding of Korean society and culture.

Bucheon University International Exchange Center will continue to do its utmost to help students develop both global awareness and professional expertise in a rapidly changing world. We look forward to welcoming students from around the globe who are interested in the Korean language and Korean culture to grow together with Bucheon University and make their dreams a reality.

Thank you.

Director, International Exchange Center
Jung-Eun Ku

Department Overview

Engineering

Department of Architecture ^{3-year}

Architecture

Intensive Major Program 1-year

4th Floor, Engineering Building,
Main Campus
+82-32-610-3300

Architectural professionals who create beautiful, pleasant, and safe spaces must possess specialized knowledge in architectural design, construction, structure, and building systems. The Department of Architecture has produced more than 6,000 graduates since the university's foundation, and we foster competent architectural experts through practice-centered education.

Employment Fields Architectural design, BIM design, structural design, safety inspection, quantity surveying, construction and building site management, administrative affairs, maintenance of apartment complexes and office buildings, building systems, architecture-related public service, and more

Certifications Industrial Engineer Architecture, Engineer Architecture, Industrial Engineer Construction Safety, Industrial Engineer Architectural Facilities, BIM Technician, Craftsman Computer Aided Architectural Drawing, and more

Department of Interior Architecture Design ^{3-year}

Interior Architecture Design

Intensive Major Program 1-year

2nd Floor, Engineering Building,
Main Campus
+82-32-610-3330

The Department of Interior Architecture Design cultivates outstanding interior architecture specialists through a creative design studio-centered educational program. Recently, we have operated various educational programs tailored to the demand for convergent and multidisciplinary design trends.

Employment Fields Interior architecture design, interior construction / specialized-brand interior design, interior graphic / interior design marketing, coordination / exhibition space design, architectural design, furniture design, lighting design, building materials and components, corporate design research, and more

Certifications Engineer Interior Architecture, Industrial Engineer Interior Architecture, Industrial Engineer Colorist, Craftsman Computer Aided Architectural Drawing, Computer Graphics Engineer Written Exam, AutoCAD Technician Level 1-2, Information Technology Qualification (ITQ) Excel, and more

Department of Civil Engineering ^{2-year}

Civil Engineering

Intensive Major Program 2-year

3rd Floor, Engineering Building,
Main Campus
+82-32-610-3310

Since 1979, the Department of Civil Engineering has researched and developed technologies for planning, design, construction, maintenance, and disaster prevention to safely and economically build structures such as roads, bridges, railways, tunnels, airports, ports, water resources facilities, water supply and sewage systems, environmental pollution prevention facilities, and waste treatment facilities. We cultivate creative, convergent talents who will lead future infrastructure construction, including smart cities and smart civil engineering structures.

Employment Fields Roads, railways (high-speed rail, subway), bridges, tunnels, dams / nuclear power plants, rivers, airports, ports, water supply and sewage systems, transportation facilities, environmental facility complexes, construction firms / structural design firms / safety inspection and maintenance firms / disaster prevention-related firms / construction-related public institutions and civil engineering public service, and more

Certifications Industrial Engineer Civil Engineering, Engineer Civil Engineering, Industrial Engineer Construction Material Testing, Engineer Construction Material Testing, Industrial Engineer Surveying Geospatial Information, Surveying and Geospatial Information Engineer, Engineer Surveying Geospatial Information, Industrial Engineer Construction Safety, Engineer Construction Safety, Industrial Engineer Concrete, Engineer Concrete, Engineer in Disaster Risk Reduction, and more

Department of Information and Communication ^{2-year}

Information & Communication

Intensive Major Program ^{2-year}

12th Floor, Engineering Building,
Main Campus
+82-32-610-3360

The Department of Information and Communication cultivates professionals needed in global IoT companies by preparing talent to operate communication networks such as giga Internet and 5th-generation mobile communication (5G), network experts required for the expansion of Internet Protocol Version 6 (IPv6), and specialists responding to the continued growth of the ICT industry.

Employment Fields Through education in the network field, students can grow into communication engineering technicians, communication equipment technicians, network administrators, system engineers, and network security experts. Through IoT practical training covering both information and communication software (SW) and hardware (HW), students can grow into system software developers, application software developers, web programmers, and IoT development programmers.

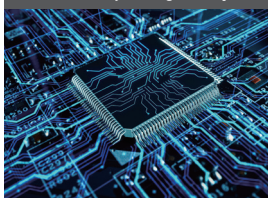

Certifications

- Network field: Industrial Engineer Information Communication, Network Administrator, CCNA, CCNP, CCIE, Linux Master, and more
- IoT practical field: Industrial Engineer Information Communication, Engineer Embedded, Mobile Application Development Professional (MAP), and more

Department of Electronic Engineering ^{Electronic Engineering Major} ^{2-year}

Electronics^(Electronic Engineering Major)

Intensive Major Program ^{2-year}

2nd Floor, Hangil Building,
Main Campus
+82-32-610-3340

The Department of Electronic Engineering operates a structured specialized curriculum and provides equipment for hands-on training in each field—IoT, embedded systems, smart factories and robotics, and semiconductors—to cultivate outstanding talent who will lead future society.

Employment Fields Advanced electronic device design engineers in IoT, embedded systems, and related fields; engineers who manufacture and operate automation equipment based on PLC; semiconductor equipment engineers; and various positions in hardware and software design

Certifications Industrial Engineer Electronics, Industrial Engineer Automatic Equipment, Industrial Engineer Computer Maintenance Control, Craftsman Semiconductor Equipment Maintenance, Industrial Engineer Industrial Safety, (Industrial) Engineer Radio Telecommunication Equipment, (Industrial) Engineer Information Communication, Engineer Information Communication Facilities, Industrial Engineer Information Processing, (Industrial) Engineer Electronics, Engineer Computer, Industrial Engineer Communication Cable, Industrial Engineer Broadcasting Communication, (Industrial) Engineer Radio Communication, (Industrial) Engineer Radio Electronic Communication, (Industrial) Engineer Information Technology, Industrial Engineer Electronics, Professional Engineer Industry Measurement Control, Industrial Engineer Embedded, and more

Department of Electronic Engineering ^{Smart Factory Major} ^{2-year}

Electronics^(Smart Factory Major)

Intensive Major Program ^{2-year}

2nd Floor, Hangil Building,
Main Campus
+82-32-610-3340

The Smart Factory Major in the Department of Electronic Engineering operates a structured specialized education program and provides advanced practical training equipment to cultivate outstanding talent who will lead future society through curricula in advanced new-technology fields.

Employment Fields Factory automation and smart factory fields, factory automation equipment operation, PLC equipment design and operation, automation equipment manufacturing, automation equipment operation, AI-based inspection/quality/equipment/logistics, Manufacturing Execution System (MES) field, manufacturing automation, process simulation, manufacturing site innovation, ICT-linked simplified production systems, ICT-linked simplified automation

Certifications Industrial Engineer Automatic Equipment, Engineer Mechatronics, Industrial Engineer Electronics, Industrial Engineer Electricity, Industrial Engineer Information Processing, Smart Factory Professional Level 1-2, Smart Factory Operation Manager Level 1-2, Smart Manufacturing Implementation Professional Level 1-2-3, SQL Professional

Engineering

Department of Electrical Engineering ^{3-year}

Electric

Intensive Major Program 1-year

4th Floor, Hangil Building,
Main Campus
+82-32-610-3400

The Department of Electrical Engineering strives to cultivate talented individuals with character and creativity who will contribute to the development of the local community through field-centered curricula that cover traditional electrical engineering theory, microprocessors, computer programming, electrical CAD, HMI, and renewable energy.

Employment Fields Public enterprises, construction companies, electrical construction and safety management companies, LED lighting and display companies, industrial electronics application equipment development and manufacturing companies, renewable energy management companies, electrical railway construction and maintenance companies, and more

Certifications

- Industrial Engineer Electricity, Industrial Engineer Electric Work, Industrial Engineer Electric Railway, Industrial Engineer Fire Protection System - Electrical, Industrial Engineer Industrial Safety, and more
- Eligibility to take the Engineer Certification Examination upon admission to the Bachelor's Degree Advanced Major Program

Department of Computer Software ^{3-year}

Computer Software

Intensive Major Program 1-year

6th Floor, Dream Building, Main
Campus
+82-32-610-3450

Entering the era of the Fourth Industrial Revolution, the Department of Computer Software aims to cultivate specialized technicians equipped with the theoretical knowledge and practical application capabilities needed to develop intelligent software, enhancing work competitiveness through the convergence of manufacturing and information and communication technology (ICT).

Employment Fields Application program developer, web program developer, system developer, mobile developer, server administrator, database administrator, network administrator, computer security administrator, information systems operator, information systems maintenance technician, and more

Certifications Industrial Engineer Information Processing, Industrial Engineer Computer System Application, OCP (Oracle Certified Professional), OCJP (Oracle Certified Java Programmer), MCSE (Microsoft Certified System Engineer), and more computer-related certifications, Industrial Engineer Office Automation, Computer Specialist in Spreadsheet and Database Level 1-2, and more

Department of Computer Information Security ^{3-year}

Computer Information Security

6th Floor, Dream Building, Main
Campus
+82-32-610-3260

As the Internet and information and communication technologies continue to advance, data stored on computers has become a highly valuable asset, and computer information security specialists who must protect essential personal or organizational information have now emerged as one of the most promising professions of the future. Accordingly, our department aims to cultivate practical computer information security professionals who can proactively respond to the shift from the knowledge-information era to the Fourth Industrial Revolution era, producing "people of character" who will serve society as guardians of the future.

Employment Fields

- Security Engineering: Security system operator, network security specialist, application security specialist, physical security specialist, security system administrator
- Security Incident Analysis and Response: Security monitoring specialist, security log analyst, digital forensic specialist, malware analyst, incident response analyst, incident response specialist
- Information Protection Assessment: Information system security assessment consultant, penetration testing consultant, security audit consultant, security evaluation consultant
- System Operation Security: System operator for corporations and public institutions, system maintenance administrator, system operation security administrator
- Web/App Development Coding: Web/App programmer, system programmer, network programmer

Certifications Industrial Engineer Information Security, Industrial Engineer Information Processing, Computer Specialist in Spreadsheet and Database, Word Processor Specialist, Linux Master, Internet Information Administrator, Specialist for Information Security (SIS), Network Administrator, Certified Information Systems Auditor (CISA), Certified Information Systems Security Professional (CISSP), Cisco Certified Network Associate (CCNA), Cisco Certified Network Professional (CCNP), Oracle Certified Java Programmer (OCJP)

Department of Video & Game Contents ^{3-year}

Visual Image & Game Contents

Intensive Major Program 2-year

4th Floor, Hangil Building,
Main Campus
+82-32-610-3470 / 3474

The Department of Video & Game Contents is divided into [Webtoon-Illustration Contents / Class A] and [Video-Game Contents / Class B], and the curriculum is developed accordingly. We cultivate talent in line with the policies of the Korea Manhwa Contents Agency and the Gyeonggi Content Agency, responding to Bucheon City's strategies to foster the comic (webtoon) and animation content industry, game content and video content industry, and VR-AR content industry. In particular, by operating our school enterprise "ZEPET Studio," students gain practical work experience alongside their major studies. We also operate convergent tracks—[VR Video Content Production Program] / [3D Game Content Production Program—which enable students to earn both a major and a minor.

Employment Fields Webtoon writer, educational content production company (illustration artist), game company (3D modeler & mapper, UI & UX graphic designer, programmer, concept illustrator), 3D animation production company (3D modeler & mapper, 3D animator, VFX, video compositing & editing), terrestrial & cable broadcasting stations (video editing & motion graphics artist), VR-AR content artist, and more

Certifications GTQ (Graphic Technology Qualification), GTQi(Graphic Technology Qualification illust), and more

Department of Textile Fashion Business ^{2-year}

Textile & Fashion Business

Intensive Major Program 2-year

6th Floor, Hangil Building,
Main Campus
+82-32-610-3320

In the high value-added textile and fashion industry, the Department of Textile Fashion Business strives to cultivate practical talent with creative capabilities in textile and fashion planning and design, fashion merchandising (MD), production management for textile and fashion manufacturing, and online-offline distribution management—meeting the industry's demand for practical field competency.

Employment Fields Textile-fashion trade, domestic fashion distribution and promotion, textile-fashion-related testing and research institutes, fashion promotion and vendor companies, fashion planning management-production management-distribution management MD (merchandiser), shop master, VMD (visual merchandiser), small-capital business and online shopping mall startups, and more

Certifications Industrial Engineer Textile, Industrial Engineer Textile Design, Craftsman Textile Printing, Knit Design and CAD, Graphic Technology Qualification (GTQ), Information Technology Qualification (ITQ), Industrial Engineer Colorist, Industrial Engineer Fashion Design, Industrial Engineer Fashion Merchandising, Technical Designer Certification, Shop Master Certification, and more

Department of Textile Fashion Business (Root Industry Training Program) ^{2-year}

Textile & Fashion Business

6th Floor, Hangil Building,
Main Campus
+82-32-610-3320

The Root Industry Training Program is an educational institution (designated in 2024 as a university for training foreign technical personnel in the root industry) that professionally educates and trains foreign technicians who will work in the "root industry (manufacturing-based industry)." After graduation and passing the skills evaluation, students obtain an E-7 visa (employment visa) and are given the opportunity to settle in Korea.

Employment Fields Textile, dyeing and finishing industry

Curriculum Program

- Step-by-step curriculum including basic, theoretical, practical, hands-on, and advanced courses in textile and dyeing and finishing fields
- Korean language improvement through Korean language-related courses (conversation, writing)
- Digital job training programs enabling students to respond to the automation of the dyeing and finishing industry and to acquire basic office skills
- Skills certification training for visa acquisition in the dyeing industry
- Practical experience opportunities through field practice and internships

Advantages

- Excellent technical education at industrial sites
- Enhanced competitiveness in the Korean job market
- Language and cultural acquisition
- Employment opportunities at Korean textile and dyeing industry companies

Engineering

Department of IT Convergence Business ^{2-year}

IT Convergence Business

Intensive Major Program 2-year

7th Floor, Dream Building,
Main Campus
+82-32-610-3460

The Department of IT Convergence Business aims to cultivate creative and convergent IT business professionals who will lead the era of the Fourth Industrial Revolution. We operate not only basic business and programming courses but also cutting-edge core technology subjects such as big data. Through industry-demand-tailored curricula—big data analysis, ERP, computerized accounting, marketing, DB, programming (Python, Java)—we cultivate practical IT business specialists by combining IT knowledge with comprehensive management knowledge.

Employment Fields IT business companies, financial institutions, big data analysts, accounting and administrative positions in general companies, online shopping malls, program developers, and more

Certifications Computer Specialist in Spreadsheet and Database, ADsP (Advanced Data Analytics Semi-Professional), e-Commerce Manager, e-Commerce Operator, Computerized Accounting, Computerized Tax Accounting, Computerized Accounting Operator, FAT (Financial Accounting Technician), TAT (Tax Accounting Technician), Craftsman Information Processing, ERP Information Manager, and more

Humanities & Social Sciences

Department of Business Administration ^{2-year}

Business Administration

Intensive Major Program 2-year

6th Floor, Hangil Building,
Main Campus
+82-32-610-3420

The Department of Business Administration aims to cultivate highly competent professional managers with practical on-site capabilities and character who can contribute to social development by responding proactively to changes in corporate and social environments, and we work to produce talent optimized for practical, real-world performance.

Employment Fields Accounting and financial managers in corporate financial management; marketing managers responsible for marketing and customer management; HR managers responsible for human resource management; production managers in production and quality control; supervisors in sales distribution and franchise sectors, and more

Certifications

- **Business-related certifications:** Certified Management Consultant, Business Diagnosis Consultant, Service Management Specialist, Distribution Manager, Logistics Manager, Sales Specialist, Quality Manager, Certified Public Labor Attorney, ERP, Trade English, and more
- **Finance and accounting certifications:** Analyst, Investment Consultant, Financial Planner, Futures Trader, Certified Public Accountant, Tax Accountant, Customs Broker, Computerized Accounting, Computerized Tax Accounting, FAT (Financial Accounting Technician), TAT (Tax Accounting Technician), Accounting Information Specialist, and more
- **Computer-related certifications:** Computer Specialist in Spreadsheet and Database, Information Technology Qualification (ITQ), MOS (Microsoft Office Specialist), Word Processor Specialist, Engineer Information Processing, and more

Department of Tax Accounting ^{2-year}

Tax & Accounting

3rd Floor, Dream Building,
Main Campus
+82-32-610-3250

The Department of Tax Accounting cultivates experts who excel through systematic theoretical education and practical training via on-site practice at accounting and tax firms and regional tax offices. Every year, we achieve successful results by producing nationally certified professionals such as tax accountants and certified public accountants.

Employment Fields Accounting positions in large corporations, mid-sized and small companies, public institutions, and nonprofit organizations / management positions in banks, securities companies, and insurance companies; sales positions; tax accounting staff at tax-accounting firms; national and local government tax-administrative public service positions; tax accountant, CPA, financial management specialist, customs broker, and more

Certifications

- Computerized Accounting Level 1, Computerized Tax Accounting Level 1-2, Tax Accounting Level 1-2 (Nationally Certified Private Qualification, Korea Association of Certified Public Tax Accountants)
- FAT Level 1, TAT Level 1-2 (Nationally Certified Private Qualification, Korea Institute of Certified Public Accountants)
- Financial Management Specialist, Accounting Management Level 1 (Nationally Certified Private Qualification, Samil PwC)
- Certified Public Accountant, Tax Accountant (National Professional Qualification, Financial Supervisory Service, Human Resources Development Service of Korea)

Department of Secretarial Office Administration ^{2-year}

Secretarial Office Administration

Intensive Major Program ^{2-year}

5th Floor, Dream Building,
Main Campus
+82-32-610-3430

The Department of Secretarial Office Administration operates foreign language, IT practical skills, service practice, and communication practice courses with the goal of cultivating office professionals suitable for the Fourth Industrial Revolution era. Through secretary office practice, computer utilization skills development, communication skills development, and business etiquette training conducted in top-level practice laboratories, we foster talent equipped with on-site experience.

Employment Fields Secretary and office administration positions in domestic and international companies, public institutions, financial institutions, educational and research institutions, medical institutions, legal institutions, religious institutions, political institutions, hotels, aviation services, and various other fields

Certifications Secretary, TOEIC, TOEIC Speaking, HSK, Word Processor Specialist, Computer Specialist in Spreadsheet and Database, MOS (Microsoft Office Specialist), Information Technology Qualification (ITQ), IT Plus, Computerized Accounting, Computerized Tax Accounting, Computerized Accounting Operator, FAT (Financial Accounting Technician), TAT (Tax Accounting Technician), ERP Information Manager, SMAT (Service Management Ability Test), and more

Department of Hotel Tourism Management ^{2-year}

Hotel & Tourism Management

Intensive Major Program ^{2-year}

10th Floor, Dream Building,
Main Campus
+82-32-610-3280

The Department of Hotel Tourism Management provides specialized theoretical and practical training to cultivate professionals for the tourism industry, a promising growth sector in the 21st century. To enhance alignment between curriculum and industry needs, we also offer special lectures by industry personnel and field training programs to cultivate talent optimized for the tourism sector.

Employment Fields Travel agencies, hotels, resorts, duty-free shops, food service industry, convention industry, F&B specialists (barista, sommelier, bartender), golf courses, casinos, theme parks, and more

Certifications

- **Travel Services:** Tourist Interpreter Guide (English, Japanese, Chinese), Airline Reservation and Ticketing Agent, Domestic Tour Guide, Tour Conductor, and more

- **Hotel Food and Beverage Services:** Hotel Manager, Hotel Service Specialist, Bartender Craftsman, Barista, and more

- **O/A Practice:** Computer Specialist in Spreadsheet and Database, Word Processor Specialist, Computerized Tax Accounting and Accounting Specialist, and more

Department of Airline Service ^{2-year}

Airline Services

Intensive Major Program ^{2-year}

2nd Floor, Hangil Building,
Main Campus
+82-32-610-0840

The Department of Airline Service cultivates service professionals who can work across all service fields, including airline service and corporate office administration, by developing sound character and global language abilities through practical, creativity-based education.

Employment Fields Cabin crew for domestic and international airlines, airline ground staff, hotel service, travel agencies, tourism companies, airport duty-free shops, convention service, corporate office administration, corporate secretary positions, government and public institutions, financial institutions, medical institutions, and more

Certifications Foreign Language Certifications, Airline Reservation and Ticketing, SMAT (Service Management Ability Test), CPR (Cardiopulmonary Resuscitation), Computer Specialist in Spreadsheet and Database Level 1-2, Secretarial Certification Level 1-2, Bartender Specialist, and more

Humanities & Social Sciences

Advanced Major Program ^{2-year}

Childcare

Intensive Major Program 2-year

4th Floor, Mongdang Memorial Building, Main Campus
+82-32-610-0822

Childcare teachers are professionals responsible for the care and education of infants and young children, and in recent years the field has gained attention due to improved working conditions and benefits. Accordingly, the Department of Childcare at Bucheon University operates a systematic educational system to cultivate and produce professional childcare teachers.

Employment Fields National and public childcare centers, corporate childcare centers, private childcare centers, regional childcare support centers, community child centers, elementary school after-school care classes, teaching materials development companies, education and childcare-related enterprises, educational research institutes, children's book publishers, educational broadcasting stations, and more

Certifications Childcare Teacher Level 2, Childcare Teacher Qualification for Children with Disabilities (upon graduation from the Advanced Major Program), and opportunities to obtain various major-related certifications

Department of Social Welfare ^{2-year}

Social Welfare

Intensive Major Program 2-year

3rd Floor, Mongdang Memorial Building, Main Campus
+82-32-610-0670

Responding proactively to rapidly changing welfare issues such as the expansion of an aging society, we cultivate professional, field-centered social workers grounded in human dignity, equipped with creativity, character, and expertise to address diverse social problems.

Employment Fields • **Community-Based Facilities:** Community Welfare Centers, Senior Welfare Centers, Disability Welfare Centers, Community Child Centers, Senior-Disability Daycare Centers, Elder Protection Agencies, Disability Vocational Rehabilitation Facilities, Community Self-Support Centers, Healthy Family Support Centers, Multicultural Family Support Centers, and more

• **Residential Facilities:** Childcare Facilities, Child Temporary Protection Facilities, Residential Facilities for Persons with Disabilities, Nursing Homes, Youth Shelters, Homeless Facilities, Group Homes, and more

Certifications Social Worker Level 2 (Ministry of Health and Welfare), Family Specialist (Ministry of Gender Equality and Family), Silver Coaching Counselor, Child and Senior Psychology Counselor, and eligible to obtain various major-related certifications

Department of Early Childhood Education ^{3-year}

Early Childhood Education

Intensive Major Program 1-year

9th Floor, Lecture Hall, Sosa Campus
+82-32-610-8330

The Department of Early Childhood Education operates a customized curriculum based on a distinguished faculty and abundant educational resources, cultivating competent early childhood teachers with professional qualifications, practical skills, and the ability to perform on-site duties for early childhood education.

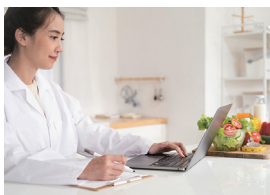

Employment Fields Public kindergartens, private kindergartens, national and public childcare centers, workplace childcare centers, private childcare centers, teachers at child-related institutions, teaching and practical instructors, companies involved in developing educational materials for young children, and more

Certifications Kindergarten Teacher Level 2, Childcare Teacher Level 2, eligible to obtain various major-related certifications

Natural Sciences

Department of Food and Nutrition ^{3-year}

Food and Nutrition

4th Floor, Yeji Building,
Main Campus
+82-32-610-3440

The Department of Food and Nutrition educates and cultivates leaders who can enhance the nutrition and health of individuals, families, communities, and the nation by learning scientific knowledge about food and nutrition to promote healthy living through scientific dietary management. As living standards rise and average life expectancy increases, interest in health continues to grow. With more women entering the workforce, increasing numbers of single-person households, and a growing elderly population, the role of food and nutrition professionals who help maintain balanced diets and healthy lifestyles is expected to become even more important.

Employment Fields Graduates of the Department of Food and Nutrition may work as nutritionists in industries (companies, public offices, financial institutions, hotels, department stores, research institutes, training centers, etc.); in schools (kindergartens, elementary schools, middle schools, high schools, university dormitories and cafeterias, special schools, etc.); in hospitals (general hospitals, long-term care hospitals, etc.); in public health centers (public health centers, health medical centers); and in other places (Center for Children's Food Service Management, health counseling, social welfare facilities, childcare facilities, special facilities). Graduates may also work as food quality control specialists in food-related industries.

Certifications Dietitian, Sanitarian, Industrial Engineer Food, Engineer Food, Craftsman Cook (Korean / Western / Chinese / Japanese), Industrial Engineer Cook, Craftsman Food Processing (Livestock / Agricultural / Fisheries Products), Craftsman Confectionery Making, Craftsman Bread Making, Children's Cooking Instructor, Food Coordinator

Department of Hotel Culinary Arts ^{2-year}

Culinary Arts

Intensive Major Program ^{2-year}

2nd Floor, Yeji Building,
Main Campus
+82-32-610-0810

The Department of Hotel Culinary Arts cultivates culinary experts who contribute to the development of the hotel and food service industry through a practice-oriented curriculum, one-person-one-equipment training environment, and on-site lectures delivered by professors actively working in the field, fostering professionals equipped with both theory and practical skills.

Employment Fields Hotel chefs and food service chefs in Korea and abroad; food and beverage service managers; pastry and bakery specialists and managers; institutional food service chefs; catering chefs; menu developers in food service companies; franchise restaurant managers and chefs; food stylists; culinary academy instructors; restaurant entrepreneurs; overseas employment, and more

Certifications Craftsman Cook (Korean, Western, Japanese, Chinese, Pufferfish Cuisine), Industrial Engineer Cook (Korean, Western, Japanese, Chinese, Pufferfish Cuisine), Craftsman Confectionery and Bread Making, Engineer Food Manufacturing, Barista, Food Plating Professional (Private), Food Evaluation Specialist (Private), Rice Cake Manufacturing Specialist, and more

Department of Beauty Care Hair Design Major ^{2-year}

Beauty Care-Hair Design

Intensive Major Program ^{2-year}

4th Floor, Hangil Building,
Main Campus
+82-32-610-0660

The Department of Beauty Care cultivates practical multi-planner professionals equipped with job competencies required across the beauty industry—including hair design, makeup, skin care, and nail care—through the latest education system and thoroughly field-centered practical training. In particular, we seek to contribute to creating the cultural value of K-Beauty, which is receiving global attention in the worldwide knowledge society.

Employment Fields Hair designer, hair salon manager, trichologist (scalp and hair care specialist), beauty academy instructor, hair brand education instructor, wig specialist designer, special effects hair designer, beauty-related magazine publisher, hair product company employee, wedding hair stylist, broadcast entertainment stylist, beauty consultant, hair salon owner, barbershop owner, total beauty shop entrepreneur, and more

Certifications

- **International Certifications:** Pivot Point Sculpture, Ladies Perm Design, Color Design, Long Hair Design
- **National Certifications:** Hairdresser (General, Skin Care, Makeup, Nail), Barber, Industrial Engineer Colorist
※ Comprehensive Cosmetologist License obtained upon graduation
- **Private Certifications:** Upstyle, Trichologist, Beauty Management, Beauty Stylist, Wedding Planner, Aromatherapist, Hospital Coordinator, Personal Color Consultant

Natural Sciences

Department of Beauty Care Beauty Design Major ^{2-year}

Beauty Care-Beauty Design

Intensive Major Program 2-year

4th Floor, Hangil Building,
Main Campus
+82-32-610-0660

The Department of Beauty Care cultivates practical multi-planner professionals equipped with job competencies required across the beauty industry—including hair design, makeup, skin care, and nail care—through the latest education system and thoroughly field-centered practical training. In particular, we seek to contribute to creating the cultural value of K-Beauty, which is receiving global attention in the worldwide knowledge society.

Employment Fields Makeup artist (makeup shops, wedding shops), TV and film makeup artist, beauty consultant, fashion magazine and entertainment coordinator, personal color consultant, cosmetics company employee, hospital esthetician (dermatology, plastic surgery, etc.), hospital coordinator, hotel spa therapist, trichologist (scalp care specialist), shop manager, beauty creator, beauty academy instructor, nail artist, and more

Certifications

- National Certifications: Hairdresser (Makeup, Skin Care, Nail, General), Industrial Engineer Colorist, Customized Cosmetic Compounder ※ Graduates obtain the **Comprehensive Hairdresser License**
- Private Certifications: Performance Makeup Artist, Beauty Stylist, Hospital Coordinator, Personal Color Consultant, Beauty Management Specialist, Trichologist, Aromatherapist, Body Shape Management Specialist (Obesity Management Specialist), Upstyle Artist, Wedding Planner, and more

Department of Health Care Administration ^{3-year}

Health Administration

4th Floor, Dream Building,
Main Campus
+82-32-610-0830

The Department of Health Care Administration cultivates professionals who will contribute to public health promotion and the development of the healthcare industry through fundamental medical courses, theoretical and practical subjects in health information management and medical administration, and practical education related to health insurance and hospital management.

※ The Department of Health Care Administration at Bucheon University operates its curriculum in accordance with the Health Information Management Education Certification Standards and is certified to qualify graduates to take the national licensing examination.

Employment Fields • Medical administration, health information management, hospital coordinator positions, and claims review positions at university, general, and regional hospitals

- Public institutions such as the National Health Insurance Service, Health Insurance Review & Assessment Service, Korea Workers' Compensation & Welfare Service, National Pension Service, and health administration public service
- Government-affiliated organizations such as the Korea Disease Control and Prevention Agency, National Cancer Center, National Evidence-based Healthcare Collaborating Agency, Korea Health Promotion Institute
- General Companies: Medical consulting companies, medical device companies, medical information companies, pharmaceutical companies, insurance companies, and more

Hospital Administrator, Health Information Manager, Hospital Coordinator, Health Insurance Specialist, Insurance Review and Assessment Specialist, Loss Adjuster, as well as Information Technology Qualification (ITQ), MOS (Microsoft Office Specialist), ECDL (European Computer Driving Licence), Computer Specialist in Spreadsheet and Database, Computerized Accounting, and more

Department of Nursing ^{4-year}

Nursing

7th Floor, Lecture Hall,
Sosa Campus
+82-32-610-8300

The Department of Nursing strives to cultivate ethical and responsible professional nurses who can contribute to health recovery, disease prevention, pain relief, and health promotion for care recipients through education in nursing theory and clinical practice training.

Employment Fields University hospitals, general hospitals, hospitals, specialty hospitals, long-term care hospitals, public health centers, worker health centers, occupational health nurses, pharmaceutical companies, insurance companies, airlines, corporate infirmaries, Ministry of Health and Welfare, National Health Insurance Service, Health Insurance Review & Assessment Service, university research institutes, teaching assistants, and more

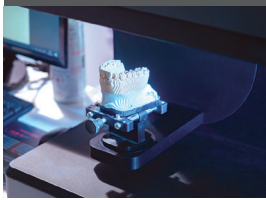

Certifications

Advanced Practice Nurse, Basic Life Support (BLS Provider), Advanced Life Support (KALS Provider)

Department of Dental Technology ^{3-year}

Dental Technology

Intensive Major Program 1-year

3rd Floor, Lecture Hall,
Sosa Campus
+82-32-610-8380

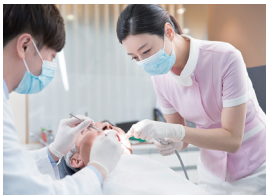

Dental technicians, who fabricate dental prostheses and appliances to improve national oral health, must possess competencies in prosthesis and appliance design, dental technology work management, problem-solving, creative convergence technology, and professional development. The Department of Dental Technology at Bucheon University has established advanced digital practice facilities, including 3D milling machines, 3D printers, and dental CAD/CAM systems, and operates industry-tailored, field-oriented practical curricula to produce digital dental technology professionals who meet the demands of the Fourth Industrial Revolution era.

Employment Fields Dental laboratories; dental laboratories in medical institutions (general hospitals, university hospitals, dental hospitals, dental clinics); starting a dental laboratory business; health-related research institutes; health administration public service; overseas employment; dental medical device and materials manufacturing companies; dental medical device and materials distribution companies; graduate school; dental equipment research institutes, and more

Certifications Dental Technician, Craftsman 3D Printer Operation, CAT Level 2

Department of Dental Hygiene ^{3-year}

Dental Hygiene

10th Floor, Lecture Hall,
Sosa Campus
+82-32-610-8440

Due to advances in medicine and changes in dietary habits, the role of dental hygienists with specialized knowledge in the prevention of dental and oral diseases and oral hygiene management has become extremely important. The department teaches techniques related to the prevention and management of dental and oral diseases, supported by an excellent educational environment that enables rapid adaptation to clinical settings, thereby cultivating professional dental hygienists capable of disease detection and prevention in the oral region as well as management and administrative abilities.

Employment Fields Dental medical institutions (general hospitals, dental hospitals, dental clinics); health institutions (health medical centers, public health centers, local health clinics); public institutions and industrial infirmaries; military medical non-commissioned officer positions; and other fields (oral health product companies, oral product manufacturing companies, research institutes, overseas employment), and more

Certifications Dental Hygienist, Hospital Coordinator, Dental Coordinator, Dental Infection Control Specialist, Hospital Office Management Specialist, Dental Insurance Claims Specialist, BLS Provider

Department of Emergency Medical Technology ^{3-year}

Emergency Medical Service

5th Floor, Lecture Hall,
Sosa Campus
+82-32-610-8420

With the increase in diseases, accidental injuries, and disasters, the need and importance of paramedics equipped with professional emergency care abilities has grown significantly. The Department of Emergency Medical Technology strives to cultivate and produce highly competent emergency medical professionals with the ability to provide rapid and accurate emergency treatment and patient care in various disaster and emergency situations.

Employment Fields Emergency medical centers (university hospitals, general hospitals, medical institutions); emergency medical support centers; firefighter public servants (rescue-EMS fields); public health administration public servants; Korea Coast Guard public servants (coast guard rescue-EMS fields); correctional officers; industrial infirmaries (large and small-medium-sized enterprises); emergency patient transport companies (EMS); military medical non-commissioned officers; civilian employees for the military, and more

Certifications Emergency Medical Technician Level 1, BLS Provider (American Heart Association), BLS Instructor (American Heart Association), Emergency Care Provider (Korean Association of Emergency Medical Technician), Level 1 General Emergency Care Instructor (Korean Association of Emergency Medical Technician), Water Rescue Specialist (Korean Red Cross), Advanced Emergency Care Instructor, Disaster Safety Director

Natural Sciences

Department of Companion Animal Science ^{2-year}

Pet

12th Floor, Lecture Hall,
Sosa Campus
+82-32-610-8390

With the increase in single-person households and the elderly population, and the growing social perception of companion animals as family members, the companion animal industry is experiencing rapid growth. The Department of Companion Animal Science cultivates future-oriented companion animal experts who will lead the industry by providing field-centered practical education in animal health care, behavior modification, animal grooming, and other specialized knowledge across the companion animal industry, grounded in a value system that emphasizes respect for life.

Employment Fields Animal hospitals, animal protection organizations, specialized animal medical institutions, animal pharmaceutical companies, research institutes, companion animal kindergartens, pet cafés, companion animal training centers, pet grooming salons, pet shops, companion animal hotels, animal feed companies, companion animal funeral companies, aquariums, pet fashion-related companies, and companion animal product distribution and manufacturing companies

Certifications Animal Health Technician, Companion Animal Behavior Instructor, Companion Animal Groomer, Animal Hospital Coordinator, Companion Animal Manager, Companion Animal Funeral Director, Animal-Assisted Psychological Counselor, Pet Fashion Specialist, Pet Aromatherapist, Pet Massage Specialist

Department of Occupational Therapy ^{3-year}

Main Campus | **Newly established**

The Department of Occupational Therapy cultivates rehabilitation professionals who help individuals with physical, mental, or cognitive difficulties perform daily activities independently and reintegrate into society. By systematically teaching occupational therapy theory and clinical practice aimed at restoring human function and improving quality of life, we seek to produce creative, practice-oriented occupational therapists who meet the needs of hospitals and communities.

Employment Fields Graduates of the Department of Occupational Therapy can work not only in medical institutions such as university hospitals, rehabilitation hospitals, and psychiatric hospitals, and public health centers, but also in a wide range of community institutions, including disability welfare centers, senior welfare facilities, dementia care centers, developmental centers, and special schools. In addition, they can advance into public institutions (such as the National Health Insurance Service and Korea Workers' Compensation & Welfare Service), industries, and research institutes, resulting in broad employment options and steadily growing demand.

Certifications Upon graduation, students are eligible to take the National Occupational Therapist Licensing Examination administered by the Ministry of Health and Welfare, and upon passing, they obtain an Occupational Therapist License. In addition, they may earn related official certifications such as Sensory Integration Therapist, Cognitive Rehabilitation Specialist, and Assistive Technology Specialist.

Arts & Physical Education

Department of Digital Media Design ^{3-year}

Digital Media Design

Intensive Major Program 1-year

5th Floor, Hangil Building,
Main Campus
+82-32-610-3380

The Department of Digital Media Design cultivates convergent digital content designers capable of adapting to any changes in the digital media environment through systematic foundational design education followed by training in visual communication (visual design), user experience design (UX), user interface design (UI), motion graphics, AR, VR, and more.

Employment Fields Visual designer, brand designer (CI, BI), web-mobile designer, UX/UI designer, social media marketing, publishing-editorial designer, e-book planning/production, presentation designer, package designer, video graphics planning/production, one-person media creator (YouTuber), VR-AR content planning and production, advertising designer, character designer, illustrator, design entrepreneur, and more

Certifications Craftsman Computer Graphics Operation, Industrial Engineer Visual Design, Engineer Visual Design, Craftsman Web Design, Engineer Colorist, Industrial Engineer Colorist, ACA International, GTQ Photoshop, GTQi (Adobe Illustrator), GTQid (Adobe InDesign), and more

Department of Rehabilitation Sports ^{2-year}

Rehabilitation Sports

Intensive Major Program 2-year

2nd Floor, Mongdang Memorial
Building, Main Campus
+82-32-610-3490

The Department of Rehabilitation Sports aims to cultivate medical trainers and personal trainers who can be immediately deployed to exercise rehabilitation-related positions by equipping students with practical major knowledge and advanced major skills.

Employment Fields General hospitals, rehabilitation centers, rehabilitation hospitals, health promotion centers, athletic trainers, fitness centers, youth sports centers, child development centers, private clinics, oriental medicine clinics, special physical education centers, public health centers, public institutions (city-county sports councils, disabled sports councils, etc.), senior towns

Certifications Health Exercise Manager, Sports Instructor for Everyday Life, Youth Sports Instructor, Senior Sports Instructor, Disability Sports Instructor, Personal Trainer, Rehabilitation Exercise Specialist, Emergency Care Specialist

Common

Department of Liberal Major Studies ^{2-year}

Main Campus | **Newly established**

The Department of Liberal Major Studies supports students in exploring various academic fields after admission so that they can choose a major that matches their aptitudes and interests. During the first semester of the first year, students receive sufficient information about the majors they may choose, and based on this, they independently select a suitable major in the second semester of the first year and then graduate from the chosen department. The Department of Liberal Major Studies aims to cultivate talented individuals with convergent thinking and creativity.

- Graduates of the Department of Liberal Major Studies can advance into various fields depending on the major they select. In addition, through convergent academic exploration, they can work in a wide range of industries as professionals with complex competencies.
- The Department of Liberal Major Studies supports students in choosing majors that match their aptitudes and interests and in demonstrating expertise across diverse fields.

Admission Guide

Degree Program

1) Annual Recruitment Schedule

Category	Application and Document Submission Period	Enrollment Period
Spring Intake	November - February	Early March
Fall Intake	May - August	Late August

2) Eligibility

Applicants who meet one of the following criteria (1 or 2), and who satisfy the language proficiency requirements specified in the admission guidelines for the relevant recruitment semester

- Applicants whose parents and the applicant are all foreign nationals and who have completed the entire curriculum equivalent to Korean elementary and secondary education either in Korea or abroad
- Applicants who, being the only foreign national in the family, have completed abroad the full curriculum equivalent to Korean elementary and secondary education.

※ It is mandatory to check the required documents and language proficiency requirements in the admission guidelines for the relevant recruitment semester.

(Download admission guidelines and application form: International Exchange Center website → Degree Program → Admission Guide)

Notes

- Applicants under “applicant only is a foreign national” must have completed the entire curriculum equivalent to Korean elementary, middle, and high school education abroad to be eligible, and in this case, must submit all of the following: elementary, middle, and high school graduation certificates (consular confirmation), academic transcripts (notarized), and a Certificate of Entry and Exit.
- Nationality is determined as of the application submission date, and dual nationals holding Korean nationality are not eligible to apply.
- Foreign equivalency exams, homeschooling, online learning, and other non-accredited methods of academic certification are not recognized.

3) Tuition and Scholarship Information

a) Tuition

Field (Department)	Tuition (KRW)
